

engineering haptic devices a pdf

Estimation method for relative position and attitude between two haptic devices M. Koeda, Y. Ninomiya, M. Sugihashi, and T. Yoshikawa Ritsumeikan University, College of Information Science and Engineering,

Estimation method for relative position and attitude

L is the distance between two end effectors in a world coordinate system. It can be calculated by $L = \sqrt{(\mathbf{r}_1 - \mathbf{r}_2)^T (\mathbf{r}_1 - \mathbf{r}_2)}$ where $(\)$ is the relative position vector of both devices.

Relative Position Calibration between Two Haptic Devices

Haptic transparency increases the generalizability of motor learning during telemanipulation Jeroen G.W. Wildenbeest — David A. Abbink — Jack F. Schorsch — Delft University of Technology, Department of Biomechanical Engineering A BSTRACT operator and an autonomous controller, are continuously combined Haptic transparency is an extensively studied subject in teleopera- and communicated by ...

Haptic transparency increases the generalizability of

Sensory substitution is a change of the characteristics of one sensory modality into stimuli of another sensory modality.. A sensory substitution system consists of three parts: a sensor, a coupling system, and a stimulator. The sensor records stimuli and gives them to a coupling system which interprets these signals and transmits them to a stimulator.

Sensory substitution - Wikipedia

Electrical Engineering and Computer Science (EECS) spans a spectrum of topics from (i) materials, devices, circuits, and processors through (ii) control, signal processing, and systems analysis to (iii) software, computation, computer systems, and networking.

Department of Electrical Engineering and Computer Science

Ubiquitous computing (or "ubicomp") is a concept in software engineering and computer science where computing is made to appear anytime and everywhere. In contrast to desktop computing, ubiquitous computing can occur using any device, in any location, and in any format. A user interacts with the computer, which can exist in many different forms, including laptop computers, tablets and terminals ...

3D models add another dimension of depth to traditional images and open doors for multimodal learning. With revolutionary implications for education, medicine, and more, 3D printing offers a low-cost alternative to creating 3D models that increases opportunities for customization and experimentation.

This is a project I'm calling Tacit. No, I didn't bother making an awkward backronym for it, it just seemed like an appropriate name that's a lot shorter (though less descriptive) than "Hand-Mounted Haptic Feedback Sonar Obstacle Avoidance Assistance Device". It measures the distance to things and translates that into pressure on the wrist.

Meet The Tacit Project. It's Sonar For The Blind. - Grathio

Minimizing assembly processes delivers stronger, better performing parts faster. 3D Systems' solutions enable the design and manufacturing of consolidated parts for increased productivity and improved product lifespans.
