Hopefully, as the framework is now maturing, more such papers will appear. Extent of this site's coverage of the Threshold Concept Framework This bibliography initially reflected the interests of the compiler but, over a decade, has been massively extended to cover most disciplines and topics in which there are published papers on the threshold concept framework.

First Who, Then What”get the right people on the bus”is a concept developed in the book Good to Great. Those who build great organizations make sure they have the right people on the bus and the right people in the key seats before they figure out where to drive the bus.

Jim Collins - Concepts - First Who!Then What?

Exploring baking powder What are the active ingredients in baking powder? In Activity 5.2”Using chemical change to identify and unknown baking powder was the only substance that reacted with water to produce a gas. Baking powder is not just a single substance. It is a combination of substances that, when mixed with water, react to release carbon dioxide gas.

Generic programming is a style of computer programming in which algorithms are written in terms of types to-be-specified-later that are then instantiated when needed for specific types provided as parameters. This approach, pioneered by ML in 1973, permits writing common functions or types that differ only in the set of types on which they operate when used, thus reducing duplication.

Generic programming - Wikipedia
