The Forex Bid Ask Spread Explained. The dealing spread observed in quotations made by forex market makers is simply defined as the difference between a currency pair's bid and ask price. The bid price is the exchange rate at which the market maker will purchase the currency pair, while the ask price is the exchange rate at which they will sell the currency pair.

Algorithmic trading is a method of executing a large order (too large to fill all at once) using automated pre-programmed trading instructions accounting for variables such as time, price, and volume to send small slices of the order (child orders) out to the market over time. They were developed so that traders do not need to constantly watch a stock and repeatedly send those slices out manually.

Discussions of trading strategies and automated trading. I asked this stupid question in r/forex, no response. If you are using tick data but set your ea to only open and close trades when it normally would but you wait for the 1min candle close and then take the trade, is that the same as using the default 1min candle closes on mt4?
