Critical Thinking Competency Standards

Systems theory is the interdisciplinary study of systems. A system is a cohesive conglomeration of interrelated and interdependent parts that is either natural or man-made. Every system is delineated by its spatial and temporal boundaries, surrounded and influenced by its environment, described by its structure and purpose or nature and expressed in its functioning.

Doblin is a global innovation firm that helps leading organizations find human-centered solutions to business problems. Since we started, we've been a hub for pioneering thinkers.

Ten Types | Doblin

Brief version Advocates understand the idea that “code is speech” to create an impenetrable legal shield around anything built of programming code. When they do this they misunderstand, or misrepresent, free speech law (and rights law in general), which rarely creates such impenetrable shields, the principles that underlie that law, and the ways those principles should and might apply to code.
