A simulation game is "a game that contains a mixture of skill, chance, and strategy to simulate an aspect of reality, such as a stock exchange". Similarly, Finnish author Virpi Ruohomäki states that "a simulation game combines the features of a game (competition, cooperation, rules, participants, roles) with those of a simulation (incorporation of critical features of reality).

### **Enhanced Greenhouse Effect - Quarter Wave**

An enhanced greenhouse effect from CO<sub>2</sub> has been confirmed by multiple lines of empirical evidence. Satellite measurements of infrared spectra over the past 40 years observe less energy escaping to space at the wavelengths associated with CO<sub>2</sub>. Surface measurements find more downward infrared radiation warming the planet's surface. This provides a direct, empirical causal link between CO<sub>2</sub> and ...
