

functional programming glasgow 1994 pdf

In computer science, functional programming is a programming paradigm—a style of building the structure and elements of computer programs—that treats computation as the evaluation of mathematical functions and avoids changing-state and mutable data. It is a declarative programming paradigm, which means programming is done with expressions or declarations instead of statements.

It's easy as 1,2,3. Graham Hutton. In preparation, 2019. For more than twenty years now, we have been using the language of integers and addition as a minimal setting in which to explore different aspects of programming language semantics.

Graham Hutton: Publications - Nottingham

In computer programming, a thunk is a subroutine used to inject an additional calculation into another subroutine. Thunks are primarily used to delay a calculation until its result is needed, or to insert operations at the beginning or end of the other subroutine.
