Abiogenesis, or informally the origin of life, is the natural process by which life arises from non-living matter, such as simple organic compounds. The transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular self-replication, self-assembly, autocatalysis and cell membranes.

Understanding Globalisation What is in this guide? This guide is meant to provide an understanding of globalisation. When people talk about "globalization" they are usually referring to technological, political, and economic changes which they believe make the world function in a different way from the way it did twenty or thirty years ago.
