Pancreatic cancer is a disease in which malignant (cancer) cells form in the tissues of the pancreas. The pancreas is a gland about 6 inches long that is shaped like a thin pear lying on its side. The wider end of the pancreas is called the head, the middle section is called the body, and the narrow end is called the tail.

Using new Technology to Improve Patient Experience - ASQ

The use of effective communication among patients and healthcare professionals is critical for achieving a patient's optimal health outcome. However, according to the Canadian Patient Safety Institute, ineffective communication has the opposite effect as it can lead to patient harm. Communication with regards to patient safety can be classified into two categories: prevention of adverse events ...

Patient safety - Wikipedia

Patients tend to have a love-hate relationship with healthcare waiting rooms. On the one hand, their presence is required in order to be seen by the physician. But on the other hand, the unknown wait times may add stress to an already tense and unpleasant situation. When you're not feeling well, the ...
