How do we get more work done? It is a question that every manager and every passionate worker faces. Yet, for the most part, teams operate on gut instinct and habit.

Lost Garden: Rules of Productivity Presentation

Productivity is the ultimate engine of growth in the global economy. Raising productivity is therefore a fundamental challenge for countries going forward. This new OECD report on The Future of Productivity shows that we are not running out of ideas.

Employment growth in any sector is equal to the difference between growth in output and productivity (output per hour of work).¹ Over the long run, output growth spurs employment while productivity growth dampens it. Between 1989 and 2000, manufacturing output and productivity growth averaged, respectively, 3.7 percent and 4.1 percent per year.

The United States has made great progress since 1970 in cleaning the air, but the job is far from complete. November 15, 1990 marks a milestone in Clean Air Act history, the signing of the 1990 Amendments. These amendments set the stage for protecting the ozone layer, reducing acid rain and toxic pollutants, and improving air quality and visibility.
